A black and white calendar page showing the moon phases for each day of the month. The columns represent the days of the month, and the rows represent the moon phases. The phases are: New Moon (solid black circle), Waxing Crescent (half circle), First Quarter (three-quarters circle), Waxing Gibbous (nearly full circle), Full Moon (white circle), Waning Gibbous (nearly full circle), Waning Crescent (half circle), and New Moon (solid black circle). The first column starts with a New Moon on the 1st and ends with a New Moon on the 31st. The second column starts with a Waxing Crescent on the 1st and ends with a New Moon on the 31st. The third column starts with a First Quarter on the 1st and ends with a New Moon on the 31st. The fourth column starts with a Waxing Gibbous on the 1st and ends with a New Moon on the 31st. The fifth column starts with a Full Moon on the 1st and ends with a New Moon on the 31st. The sixth column starts with a Waning Gibbous on the 1st and ends with a New Moon on the 31st. The seventh column starts with a Waning Crescent on the 1st and ends with a New Moon on the 31st. The eighth column starts with a New Moon on the 1st and ends with a New Moon on the 31st. The ninth column starts with a New Moon on the 1st and ends with a New Moon on the 31st. The tenth column starts with a New Moon on the 1st and ends with a New Moon on the 31st. The eleventh column starts with a New Moon on the 1st and ends with a New Moon on the 31st. The twelfth column starts with a New Moon on the 1st and ends with a New Moon on the 31st.
